MUHAMMAD ZAID ATHER

Erlangen, Germany | zaidather89@gmail.com | +49 15565385705 | linkedin.com/in/zaidather | github.com/ZaidAther

TECHNICAL SKILLS

Programming & Software Development: Python, SQL, JavaScript, REST APIs, Git, GitHub, Scripting, Software Development

Automation & Data Engineering: Python Automation, ETL/ELT, Data Processing, Data Validation, Data Migration, Workflow Automation, Pandas, NumPy, Jupyter

AI-Assisted Development: Prompt Engineering, LLMs, AI-Assisted Development, GPT-4o, LLaMA, Gemini, Claude, LangChain, MCP

Machine Learning & AI: Scikit-learn, PyTorch, TensorFlow, Deep Learning, NLP, Transformers, Model Evaluation

Application Development & Deployment: Docker, AWS, FastAPI, Flask, Streamlit, REST APIs

EXPERIENCE

BASF SE — Ludwigshafen, Germany

Data Science Intern – Management Consulting | Jan 2026 – Apr 2026

- Developed scalable Python-based data processing and automation pipelines for data ingestion, validation, preprocessing, transformation, and reporting, replacing manual Excel-based workflows.
- Implemented data validation and quality checks to ensure reliable and consistent data processing across analytical workflows.
- Automated recurring data-processing and reporting workflows, improving efficiency and reducing manual effort for consultants and stakeholders.
- Built interactive dashboards for monitoring KPIs, workflow metrics, and review processes, supporting efficient analysis and decision-making.
- Collaborated with consultants and stakeholders to translate business requirements into practical digital and analytical solutions and improve existing workflows.

Helpsta — Nuremberg, Germany

AI Developer (Working Student) | May 2025 – Aug 2025

- Developed and deployed Python-based software and machine-learning solutions for real-time data analysis and prediction.
- Integrated OpenAI LLMs and AI-assisted capabilities into production applications for chatbots, text summarization, and content generation.
- Built a voice-driven AI interview application using Google Gemini, automating question generation, audio transcription, and candidate evaluation.
- Applied APIs, scripting, and automation to integrate AI capabilities into application workflows.

Hikerr — Lahore, Pakistan

Data Analyst | Oct 2023 – Sep 2024

- Developed Python and SQL ETL pipelines for collecting, transforming, validating, and preprocessing structured and unstructured data.
- Implemented automated data-quality checks and validation workflows to ensure accurate and consistent processing.
- Automated recurring data-reporting processes, reducing manual effort and accelerating reporting cycles.
- Worked with structured data workflows to support reliable business analysis and decision-making.

EDUCATION

Friedrich-Alexander-Universität Erlangen-Nürnberg (FAU) — Erlangen, Germany

M.Sc. in Artificial Intelligence — *2025 – Presen*

TECHNICAL PROJECTS

Sentinel — Software Impact & Risk Analysis Tool

Developed a Python-based engineering tool to analyze code dependencies and predict the impact of software changes across projects. Implemented AST parsing, graph algorithms, semantic search, and local LLM reasoning to automate change-impact and pull-request risk analysis through an interactive Streamlit application.

Hiker — Python & SQL ETL Automation Pipeline

Built Python/SQL ETL pipelines for data ingestion, transformation, validation, and preprocessing of structured and unstructured data. Automated recurring data-processing and reporting workflows, reducing manual effort and improving processing efficiency.

Resume Intelligence — NLP & RAG Application

Developed a Python-based application for automated resume and job-description analysis using spaCy, FAISS, and sentence-transformers. Implemented semantic search and RAG-based analysis to automate skill-gap identification and generate structured evaluation results

CERTIFICATIONS

Data Science Job Simulation – BCG X

Agile Methodology Virtual Experience Program – Cognizant
